

KAYTEK
smart digital business

TRANSFORM YOUR COMPANY INDUSTRY 4.0

Kaytek Platform digitalizes your industrial processes, providing real time control of your production and all the assets (machines, robots, people...)

Take the decisive step for the digitalization

Blockchain, Big Data, IoT y AI technologies

TECHNOLOGIES

BLOCKCHAIN

IOT

BIG DATA

**ARTIFICIAL
INTELLIGENCE**

Kaytek Platform is the definitive solution that has natively integrated the main enabling technologies of the 4.0 industry: IoT, Blockchain, Big Data and Artificial Intelligence.

The use of the most advanced technologies allow us carry the industries into the digitalization in an easy way, achieving a Return on Investment within less than one year.

MAIN FUNCTIONALITIES

Automatic collection of
information from machines
and robots
IoT

Real time data & Dashboards
OEE - Quality- Lead Time

Automatization
y digitalization
Paper elimination

Control & reduction of the
Costs and Stock
Supply Chain

Optimization of the planning
Artificial Intelligence

Geopositioning & full
traceability of the work, tools,
workers and equipment

Worker training, reducing
manual labors

Changes in production and
universal access from
anywhere in the world

HOW DOES KAYTEK PLATFORM WORK

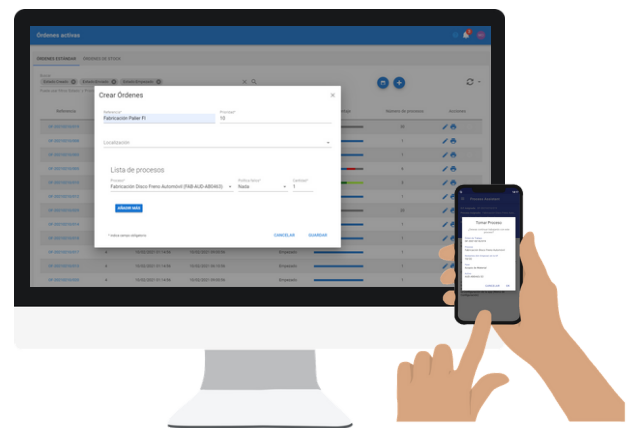

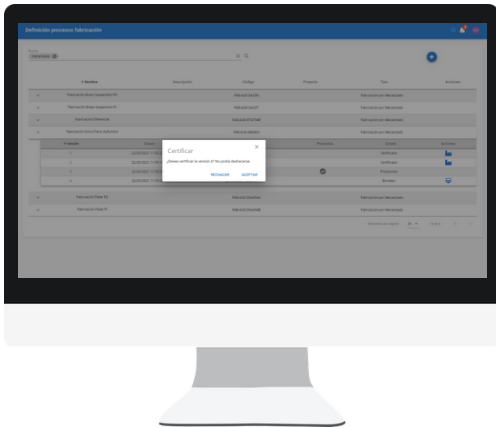

Fase 1: DEFINE

- Intuitively through the management system, the client defines the manufacturing processes with their phases, steps and assets involved; machines, robots, people...
- The processes become digital, eliminating paper and allowing any type of change and versioning.

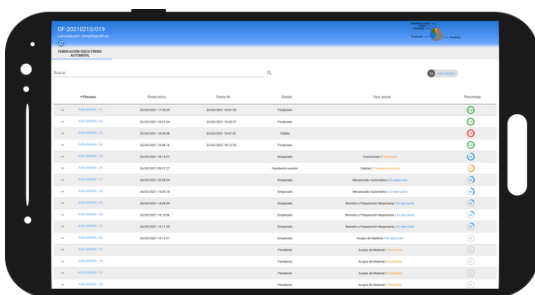

Fase 2: CERTIFICATE THE PROCESS

- Once the process is defined, it is certified by authorized personnel using their Blockchain digital identity.
- Blockchain Smart Contract technology guarantees the immutability of the data and the execution of the process as specified.

Fase 3: DEPLOY

- The client creates the manufacturing and work orders by choosing the processes to be carried out.
- Jobs are automatically generated and sequenced over time by the platform, using artificial intelligence to optimize production.

Fase 4: EXECUTE

- The instructions are automatically sent to the workstations. People, machines and robots are guided without human intervention to achieve manufacturing objectives.
- IoT and Artificial Intelligence technologies monitor any type of asset in real time, showing the complete traceability of the plant's operations.

Fase 5: MEASURE THE RESULTS AND IMPROVE

- The Big Data and Artificial Intelligence module constantly evaluates processes and jobs, providing a global vision of what is happening in our industry.
- Kaytek Platform facilitates optimized decision making for the improvement of production processes, product quality and early resolution of incidents.

INDUSTRIES

4.0 INDUSTRY

AUTOMOTIVE

AEROSPACE

**STEEL MILLS &
FOUNDRIES**

**RETAIL &
DISTRIBUTION**

**ELECTRICITY &
ELECTRONIC**
