

TRANSFORM YOUR COMPANY INDUSTRY 4.0

Kaytek Platform digitalizes your industrial processes, providing real time control of your production and all the assets (machines, robots, people...)

Take the decisive step for the digitalization

Blockchain, Big Data, IoT y Al technologies

TECHNOLOGIES

MAIN FUNCIONALITIES

Kaytek Platform is the definitive solution that has natively integrated the main enabling technologies of the 4.0 industry: IoT, Blockchain, Big Data and Artificial Intelligence.

The use of the most advanced technologies allow us carry the industries into the digitalization in an easy way, achieving a Return on Investment within less than one year.

Automatic collection of Real time data & Dashboards information from machines **OEE - Quality- Lead Time** and robots ΙοΤ Automatization Control & reduction of the Costs and Stock y digitalization Paper elimination **Supply Chain** Geopositioning & full Optimization of the planning traceability of the work, tools, **Artificial Intelligence** workers and equipment

YTEK

Worker training, reducing manual labors

Changes in production and universal access from anywhere in the world

HOW DOES KAYTEK PLATFORM WORK

Fase 1: DEFINE

- Intuitively through the management system, the client defines the manufacturing processes with their phases, steps and assets involved; machines, robots, people...
- The processes become digital, eliminating paper and allowing any type of change and versioning.

Fase 2: CERTIFY THE PROCESS

- Once the process is defined, it is certified by authorized personnel using their Blockchain digital identity.
- Blockchain Smart Contract technology guarantees the immutability of the data and the execution of the process as specified.

Fase 3: DEPLOY

- The client creates the manufacturing and work orders by choosing the processes to be carried out.
- Jobs are automatically generated and sequenced over time by the platform, using artificial intelligence to optimize production.

Fase 4: EXECUTE

- The instructions are automatically sent to the workstations. People, machines and robots are guided without human intervention to achieve manufacturing objectives.
- IoT and Artificial Intelligence technologies monitor any type of asset in real time, showing the complete traceability of the plant's operations.

Fase 5: MEASURE THE RESULTS AND IMPROVE

- The Big Data and Artificial Intelligence module constantly evaluates processes and jobs, providing a global vision of what is happening in our industry.
- Kaytek Platform facilitates optimized decision making for the improvement of production processes, product quality and early resolution of incidents.
